- HDMI and USB Inputs in front of panel
- All channel can be loop–outed by HDMI
- Can be used in educational classes (schools, miversities, educational institutions, etc.) and conference halls.

With Shahab smart TV, you will have access to the world's most popular operating system, Android. With it, you can install Android apps on your TV, connect to the Internet, and browse the web. Enjoy your smart TV with easy access to the Internet and entertainment.	
This feature, which stands for Hybrid broadcast broadband TV, is a feature with which, in addition to broadcasting the content of television channels (broadcast), the TV is able to display additional and interactive content such as news, archives, conductors, games, etc. through the Internet (broadband). is. The process of using this service is very simple. Just connect the TV to the Internet and place it on a network that uses this service. A sign in this regard appears in the corner of the TV. Here, by pressing the red key on the TV remote control, you will access HbbTV interactive service.	
With Screen Mirroring, you can see the content of your mobile phone screen with higher quality and resolution on the TV. To use this feature, you don't need any cables and connections, and you can connect your smartphone to the TV only through WiFi waves and enjoy working with it	 Screen mirroring
HDMI-ARC provides the user with the ability to transmit sound through the HDMI port, and in this way, you can connect digital sound to your audio system (peripheral device) with the help of an HDMI cable. With HDMI-CEC capability, the user can control all connected devices using only one remote (TV remote) at the same time	
If your TV and mobile phone or tablet support this feature, you can use a special MHL cable to see the image of your mobile phone or tablet on the TV and control the connected device using the TV remote control.	
With PVR, don't worry about missing your favorite program. The PVR feature allows you to save your favorite program on a flash drive and watch it anytime.	
Time Shift allows you to pause and manage the program that is playing for a few minutes. In short, this feature allows you to watch a delayed digital program.	 Time Shift
Being equipped with HDR enables the contrast rate and observed colors to increase, which will result in more realistic and natural images than what we see on TV
